EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John DeLuca on 17 August 2004.

The application has been amended as follows:

In claim 1, line 2, insert -flexible- after "one".

In claim 9, line 3, insert -flexible- before "cable".

In claim 35, line 2, insert -flexible- before "cable".

Cancel claim 47.

2. The following is an examiner's statement of reasons for allowance: Regarding claims 1, 9 and 35, the feature of, inter alia, a winding comprising a flexible cable or winding formed of a plurality of insulated strands and at least one uninsulated strand is not disclosed by the prior art, in particular the combination of Shildneck and Elton. Schuler (US '476) teaches a bar-winding for electrical machines composed of twisted, insulated conductors 1 and uninsulated hollow conductors 2 (c.3, lines 55-56; Fig.1). However, Schuler's bar-winding is not flexible, since during manufacture a strip of mica-resin putty 4 is placed along the bar in a partially-hardened condition (B-condition) and then pressed for several minutes at 180 degrees C and then allowed to harden (c.4, lines 28-36).
